# The Second General Letter to Correspond!

The jour to proporting Christian Knowledge have by mo Roward your Answer to my Lotter Wherein you had a general across of the Dosigns of y focioly & of some of the Mothods they Use for earlying thom on: They are pleased we your Ready Acceptance of their Correspondence; and espotially we you desire & Zeal to promote the same Dosign in your Hoigh bourhood.

The Society believe you may bost do that by some such Mothos as I menconed in my former Lotter; But since Stothing very considerable therein can Phap's be done by any one clone; or alleast for if greater Countonance of your Endcavours, & for romoving such difficulties as have been Ordinarily motion. They think it nocoffary you should provail to such of the Clergy & Laity of your Hoigh bor hood as you find bost disposed and able to joyn is: you in this Charitable work: exal they hope you will find no great difficulty therein Since the frequent meeting of the Clergy for the discouragement of View and advancement of Piet half been particularly recommended by the exal B. of Canterbury and other Lords & Bishops in their Circular In

When One you have Set up a Society altho at first it Confishs not of more than 3 or 4 such persons & before hinted at you will

find your work much Eafior than you imagined .

As to the Place of meeting, Itmay perhaps be propor to consider whothough Private House may not botter answer the Ends of your ooting than a Publique one; But as to that & concorning what Rules bosides the Laws of the Land & Canons of the of Church You shall govern your Selves by, your own Piety & Prudeme well lost direct you.

The focioty will present you a small Racket of such Books & Lapors as they at prosont disporso for the promoting thristian - Knowlodge and Practico, as soon as your end particular directions to it may be sent & on what days your larrier goes out from hence.

Julhis Packet you will find a stone Catalogue of many other Books Servicable to that Burpose Some of which also the Society have Occasionally dispossed to good Effect. And if you should be

minded at any hime to give some of them amongst your lovery ay Jociety will assist you in Oblaming such as you shoudesire at the Lowest Rale. 06 Mey hope to bear frequently from you and as occasion in ceo! offer, to recommend to them such worthy Lordons (Coming at Some 19 distance from you ) as you judgo propor for their Correspondence pori after they have been arguanted in the Societies designs & have intincated a willing not to Correspond with them, and that horn you will lake care such sersons bo Mon of Ridy Fumility thos Charity & Toal for promoting Christian Knowledge. Pr Bofore Jond this Lotter Jam to acquaint you wo a Rosolution of the Society Vizt. vor That it bo rotommonded to overy Memberlo Eray to ies Alwighty 4006 for a Blofsing on the Consultations & Endoavour you of the Society . I am k: Lease to direct as before. the and The fist yen Sett to e V.B. Correspondents. Lu ish Lev. fir li The dociety for propagating Christian Knowledge 2 Side have Orderd mo to acquaint you; that upon the Caracter they have Hens from Mo Chamberlayne of your Livy Charity and Itian Zoal, and oside out of a hoarty Estoom for you on those Accounts they have Choson rin you a Corrosponding Mombor of thoir focioly desiring yo Concurrence ook withe Prosecution of their Designs by such thothods as whan bride and Charly shall diroct Allho the Good Effect of the Jourties Esideavours are vifeble Hou in many parts of South Britain, yot the Lorsons concorned are not e. por haps commonly known, except to the Corresponding Members wi other by the Rules of the Society may and are desired as they have oppor huily to attond their mootings.

They are a Volumary Society of about 10. Years standing confisting of Several Lords Spiritual and Tomporal & other worthy Lersons both of the Clorgy and Laiety in whom it hath pleased Almighty God to Excite a Stoly zeal for his Honour and a great

Lowo and Sondornofs to the Souls of mon.

This Society hach some hims been mistaken for that of Beformation of Maners, & the the End of both is directed to y Glory of God & the good of Mankind, you the Moas was taken by each are different: The fociolies for Reformation applying themselves Chiefly to the putting the Laws in Execution against Exephanof: and Debauchery, whereas the Endoavours of this fociety are immortially directed to & Propagating Itian Knowledge, especially among & Lover Sort of Proople, is they have been carrying orefron their logining) is great diligence and application attended with a large Exposure de frayed Chiefly by their Own Voluntary Subscription

The Endeavours used by this focioly for carrying on

thoir good dosigns are various wiz.

By Sotting up & Promoting Charity Tehools in London and Westminstor where thoir Mombors choifly roside and by oncouraging the like in severale Counties of England and Wales by if assistance of their Corresponding Mombers, and it hack pleased God to give a Blossing to their Evidences, & mightly to Prosper and Increase Such Schools.

not only against the Comen Vices but also for the Sustruction of the Lover Sort, in the Linowlodge of God, and of our Italy Religion, and four Italy Religion, and for their afsistance in a track of many particular they have also dispersed little Tracks of many particular Dulies which are too much neglected as of Prayor, frequenting in It. Communion, Observation of the Lords Day, Roskitution, The Buly of God fathers and God mothers &c.

The focioty on Sundry Occasions and as fitting opporture inition offered have also disported Soveral Books against Lopery, Antipodo baphism, and Quakovism whoroby its hop's they have Guarded many waveving & woll moning loople from those

brows, and also brought some out of them, And by the Ble sing of almight God on thoso and the like Endeavors the Society hope they have done much Good, and in many places rendered the Labours of the Clergy more cafy and Succossfull. It may be further added that by mouns of this Society many good Mon are bocomo moro known and Ufefull to one unother by a Christian Como sation & Correspondence and have a far greater Lower by the Graes offer of doing good by their joynt afsistance and device than singly can bo ky This consideration togother withe Success it has pleased God to give to

their Endoavours are constant motives for proceeding in their designs and inviting good Men into them .

Ash Corresponding Mombors the Soveral ofthom do Contributo yourly to the Society for Carrying on their designs yet by the Bules of the Jourdy that is not require of them but only that they should Countonance & promoto the same Charitable purposes where they live as they have ability and Opportunity.

Und as the Society doubt not of yo authority and Lower so they ard woll assurd of your road ins and Teal to sett forward to good an undortaking, which by the Countenance and apistamo of you solf and other good Mon amongst you is as they understand in a great moasure abroady advance in North Britain: and that those Christian dosigns may boby y bost advice and afsistance promoted both horo and thore for the Glory of God, and the good of mankind to the Lleasure and Comfort of us all the Socioly desirs a free and conflant Correspondence is you, and as soon as you Signifie yo Confort thoroto they will give you Nohis by what he to carry on such a Correspondence and in the mean time I am

agens,

communicated it to the Society, who have ordered me to acquaint you that the methods used, when a Working = School is erected, are to get sober men or women, that \_ understand spinning, weaving, Sewing, knitting, mending or making cloaths or shoes, to teach the Children certain hours of the day in those faculties, by which means \_ legs much of the expence of cloathing and mending of Cloaths of the Children is saved. And when they have made any proficiency, so that they don't spoil their work, the Overveen or their friends send in wool & Slaw, and have it wrought at such reasonable rates, that they scarce ever want work when once they have acquired a reputation of doing it me As their stock increases they get conveniencies for brewing and baking &c. within themselves, whereby they save another considerable article of expense.

The Trustees or Overseers generally appoint their Treasure or Steward to superintend all these Artificers, who being for the most part an active man, has his eye in every corner upon the management; and to his conduct & diligence is chiefly owing the improvements such a little Community become masters of. And to his Thrift, and partly to the natural advantages of the adjacent Country it is that the labour of such a school, after it has once gained an Establishment, shall very near intively support it self, the oftener the produce of yelabour is much left than y expend But

But to give you a fuller Idea of this matter, I think I can do better, than to lay before you a Summary Account of the profits & disbursments for a School, as it was lately communicated to the Society, by a Corresponding Member at Stamford : his Letter is dated 8. march 1710. My last to you were severally of the 19 of Ther 1711. By in Marlborough, a Duplicate of which Accompany's this, Since then y Society have the Satisfacon of hearing of Do Welfare, and hope by the next return of Ships from Madras to hear from you, in answer to such particulars as they would gladly have your Choughts—upon. They hope the fane Frigate is ere now safely.... arrived and that the printing prefs paper & which were. I consomed by Gov. Collett are Delivered to you, In Collet has no doubt informed you of his drawing on a Member of the Society.

for 150 pound as the ranson of them which he Supposed to be half the prime lost, and so it would have been had the Peices of 8/ Bite other things sent in that thip been saved, but by his & mit flinck's account of what is Saved the brime Cost did not amount to above 120: -: 9 as you will See by the Estimate below The particulars of which are given to the German Drinker now going over, howevery Jociety being thoroughly convinced of the good Intentions of you. Collet, and being advised from mot flinck of the many livelity he had reced from him during the vagage to Brazil, and in Court offis giving him and them balsage and Froight free the Remi of the Voyage to India, came to a Refolución lopay m. Collets Sice of 150 hound lepon Condicon any responsible for or fond would become Jecurity to refund such part ofit in proportion as Should hereafor be abated in the whole Ranforme to the Efindea Conyany and the Owners, there boing some Likelihood that the Captors 100. Gield tomake an Abatement since the Company had refused to pay the Raufon on their parts as Exorbitant; But no perfor here Hinking it proper to give such Security for money which floy were imediately to pay out of their hands, the matter lyes in Suspena hell the Society Understand what agreement the Company & the Captors make, But in the mean hine the Society being in formed that M. Colletts Son who was bostage in France, slood in need of u-Jupply for his Subsistance, they advanced 30 pounds ofine that another 30 pounds tobe remitted toline. If the Jame Fright be safe arrived you will hear of the Death of m Finch soon after me Collet left the Coast of Brazil, a los not easily to be repaired considering of Capacity off Man the affecton he had to the good work hewas Lentryson

to Succeed lim, and have some hopes they will prevail with a finite low line Country of whom they have an Extraordinary Character to goe in Quality of a wishimary or Schoolmaster, But the Fleet not going being soc near their departure; it was suppossible for him to be ready to embrace this Opportunity, and therefore if God please yourside goe righ to see him and perhaps another by the next Fleet.

Since the Society could not be so happy as to send overaperfor on Wis Service now, they are very much pleases to find that the last Audia Company have been disposed to Send over 3 Chaplains to their Garrisons at Fort & George, Fort S. Davids, & Bengal, who they lapse will do what they can to facilitate the propagating Thanity in their Several Stations, and for that end have desired a Correspondence will Them, M' Stevenson and M' Long have each of them a Box of 50 Portugueze Zestaments to be used as you and they shade Hink most Adviscable with an addition of abruef Justicon adapted to the use of Children and as many Copies Single . This was drawn up by the Reverend W. Blutscho during his short stay here, and printed of hastily to save the passage in this fleet, so that some faults must be accords for which must in all Dikelihood have escaped the pres. In each of the Boxes there is putup half a dozen formon Books in the Portuguele Language not for the Sake of the Doctrines contained in them but to Enable the Missionaryos as well Danish as English who may defire the use of them to acquire the portugueze language more perfectly.

Swinford in Wore: sent to D. Hallifax 10. March 1712/13 in May lolis Letter from old fivin ford the 26 Jany No. 3441. Upon perusal of the Deed of Teust and the Clauses of In! Glover's Will therein racited and of D' Hallifax's Letter thereto relating theiring that the particular funds allowed for teaching the Children, buying Books of are not Sufficient to defray those Charges. Itseems to methat the Erustees may apply wis Vecepary for the rospue purpoles in the will altho such moneys exceed the particular furnes allowed : first became it all along appears to be the Destators Jutout that lix boys thouts be tought andy! they thould have Necessary Books Dr. Which intent is more to be regarded of Seems to me) than those Causes which Limit the Sticular Expences when Such Expences will not an fiver the End proposed by thom Because noticular firme is Simited to the relief of poor familys but only the residue of the profits is directed that way This Derife of the Residue further Shows that the Cestators Intent was to have the Charity to the Children fit Served And there been any flicular fume limited to the other Charity and that's Fund was not Sufficient for both Then Ihmh the Frustees should have abuted of each thanky in proporcion But front think there is any roome for such Inter-= pretator in the present lase Vevertholes in as much as the residue of the profits are directed to be applied with the advice of the parson Church Warden, and over feers of Report and that such director may give them aboundle hereafter to find. fault with the for applying more to the Boys Educacord than the will exprofily allows It seems adviseable that the Govern. Thoud procure an order of the bestry for their applying so much more as will be necessary love added to wake the allowances in the will Sufficient for the purposes intended and that Such additional himes be expressed in such ordet. It is observable that by this will and the Deed which is made in fluance thereof Chat the Trustees for this Charity are now the same 8 persons who are the Governors of H. Eswards School and Ral III Glovers Prairys are to be all along directed and managed by god Governors . Het that the Number of Erustees or of Such fors as have the Legal Estate boing not lobe filled up lill they are reduced to firee I will fall out in hime by the Elocon of Governors as they dye That W. Glovers Charity will come to be managed by 4 or 5 fons who will have no right to take the profits of the Estate Therefore it feens that this should all along to to for rentred, as that now be printed lowed be with the profits but such only as have of istale in them least they who have the Estale come to answer fory Nonapples or misapplication of much who this their Means or neglect take them.

The Concern you are under at present about a fure and certain knowled very first and initial Lesson of the Christian Religion, I mean the great Duty of Self refignation to the Divine Will . If we follow the Lord in whatever We undertake, Wehave then the promise, he will Guide us with his Eye; and if We run before him . We must needs fall into many . Dangers and Untroden Bryways and lofe our felves at last in the Devices of our own heart. The Difficulty you labour under to gain a five forenity of Mind about the Removal from a place, where you fee the Jeed of the Gospell fring up, to another that byth altogether Barren and Uncultivated as yet, is so far from being Blamed, that it deferveth the oncudation of those that are in any Degree acquainted with the work of the Ministry in General, and the weight of a Mission in particular. Any one that Ventureth upon so hazardars our Enterprise without a Safe fourpass to feer by, may cafely be cast away, in the Ocean of many Unknown Templations that are like to befor him. Whoever intendesh lobild that Tower, and doth not fift it down and Count the loft, whether he have where withat to finish it, will be laught at by the spectators, as a man of no fence and forelet. He that will blow up that fire, which the Lord is come to send upon lath, must not accomplit with the breath of his own proiferest Zeal, left he blow up Mange fire which the Lord Comanded him not. And he that will put forth his hand to take hoto of the ark of God, unft befure to do it regularly and with a pure Hand, left he himfelf Sye by that ark, which he defigned to Jupport.

Now

Now to Manage so Momentous a matter with the Greater hope of Swafs the Lord healt promised us the Spirit of power, of Love, and of a found mind. Bower maketh us bold, Love maketh us willing, and the Sundness of Mind maketh us prudent in the administration of the Misterys of y Gospel. If one of these live Gifts of the Spirit be wanting, the whole chain of the Ministerial Junction falls to peices, and the whole undertaking must need be unhinged in the most forsiderable Branches of it. and who is sufficient for these things!

In reality were what the Names by their original Dorivation to Import, it was not flien very hard, to distinguish vetwict a true & counterfeiled - Minister of the yours! None was willing to go on so trouble forme an Errand, but he that was ready to Endure Hardfling with the Gorgel and to Expect no other freward here for dispensing the word of Salvation than Reproaches and Martyrdom. But as some in the nearer ages.... Offices came to be turned into Benefices, and painful Labour's visto gainful Livings: Nature herself, this no great Friend of the Rules of the Gospell, losh up readily the Name of Christianity; and the forfession of Christianity that applyed to Smister Evids and purposes is no longer haled by the Incompt bould, nor is it now an Infallible Left of true and unsteigned tous felson.

All the fefor fiderations, this they way in four manner be use ful to a missionary, yet will they never beable to solle the Mind on a firm foundation. Is it is god alone that must prepare us; soc'his god alone, who by advine supression must commice us. I say, by a Divine supre sion. Human Dersuations can at the best, be get but Human Convictions. As the water cannot move higher than the Fountain of it; so a human persuasion let it come from never so good. Eument, and able a Man, can favy a Man no farther, than to a humane conviction. and soon can street when thretend to raise a divine Tabrick on the Shallow foundation of the Persuasion or advice of eller? and what should store, if soil meet with Cas in so around a me we must supposed many unknown tribust to supre we must supposed many unknown tribust se sent soil as to my survey survey to have soil soil as to my survey and ordered form has sent me, oud there say with a Holy Boliness of Faith: Lord thou has sent me, and thou

But when for Derive Conviction, for not undervalue at all my mitual conference with Triends, and other fresh Helps as may be folched for fouls acquainted with the ways of providence: For offen is the ord pleafed Convey to us the Sanowledge of his Will, by the voice of a Triend. But flies must know his the Voyce of god that I seaks thir un friend. Whenever if meanest forwant brings us the King's order, we ought to Obey, But yet the must know his the kings order hebrings. No Corefully ought we to distinguish between the word of god and the work of mon in the Dransactors of a thousand between the word of the will day. and the work of their own, and your conference against an Evil day. and your feel pour both of their own, and your forference that thing will rather stay till your Mind is clearer determined, and the Difficulty's removed, than see you move out of a Sphere with double Simpich, In which providence hath visibly seconded your Endeavours, and rendred them. The which providence hath visibly seconded your Endeavours, and rendred them.

I remember upon this Occasion , that when was to writt my Notion Country Some years agos, & go into England, in order to fet up a little Jehool among my Combrymen here, it happened, that a week before my Departing, I had, what we call, a Benefits offered we, with fuch a Salary as might have made my life in the Way of the world cafy Hompstable ownigh. and it was then all on a finden, that my Mind bent upon the inbuided Jourse began to Waver. My Reafon told me on one Hand it was perhaps the will of God, Thouth Stay where fivas; why I thouth goe to a faintry where that hardly any acquaintance stall, and Riereby Expose my self to trouble & Hardflies, with wany other frightful Juggestions of that Nature. on the others Hand front not but be very Suspicious of all thefe Impressions that hound me, as coming from no better principle than that offerupted felf love. Reafon was not able to give the decifive Broke in this matter. For as une after the fall it is become alleast and Unstable thing, So it can us more be described upon than a Judge Correpted by the Bribes of a Party. and this it has forme glimering Light Ceft in it; yet is eventhis put into fo dack a Landhorn, I mean a Selfish Heart, that I find it never fafe to flie out of Doors with to Uncertain a Guide. When Iwas thus he m'd in on

all

Providence happened to light on the following passage in an of Practical author: If thouart Labouring under many Doubts and peoplexitys, and rother in the following possage in an of Practical author: If thouart Labouring under many Doubts and peoplexitys, and rother what to choose, then choose that what is most against they Latural fuctionations. No former did freed this, but my mind was at lake All the Mist that hung about me, gave way, My Doubts like so many Tomos, dropt off, and I found my selfaster to many Tossings in a quiet to forme Region, seeing as it were, the way beat out before me which I should go; and Reason itself the great Framer of frightfull seas, not daring the unch as offer to darken any more the Convincing power of that Light which so happily determined my lase.

To not telly on this. as if it had run Paralell with 10 take Fis only in relation of the whatter Pranch thereof. I quote it; bis! to let you fee what I wear by a Divine Considered, and with what laze this is to be diffinguished from the Perfuations, Laws, and Solicitations of them, in any Mosnowous Enterprize. We ought to hear the advice of them, and even of the meanoft of our Fellow Exalures, particularly if he be a griend of you himself; but the Applicatory Work is the and only in the Handsoff by whom the External Light given by a Friend is fin profled both upon the Will and underfronding with a Divine after once, and thereby our will and underfronding with a Divine after wee, and thereby our will sof that Wature, that it never reft in general province; but must have every bramise of the Goffel in particular appropriated to itself in a higher being than than is. If this applicatory trake whereby all Spiritual things are set home and unde very own, be wanting, then the Gospel of this in all its Riches and promises is take a Table Furnished with plenty of Clinic in all its Riches and promises is take a Table Furnished with plenty of Clinic and Exquisite diffies, but which I have no alberty to taft of

May the Lord teach us the Way which We shall walk in! May he grant us that Singleness strye, which constantly looks up to the main with, making allow dosires uniform, and all our actions of a peice. Comunicated to the Cornel

Mos humble Friend Ferrant Anthony Will: Boshm

To the Reverend mr. Griffith Sones at Laugharn in Carmor the Reverendelir Then I consider the Nature and Suportance of that Worse proposed to you, which is no less than the bringing in the Gentiles into the Folk of Christ, and the hould Enlarging his Ring dom upon Earth , Sam almost afraid to Intermedale in this Affair 10e being Conscious of my own Sufrificiency, and of the Blindues of Humane Reafor in the things of God: Yet since you have defired my advice among the reft: and that Thave been likewife Required by the Gentlemen concerned to give my Thoughts in this y in matter; In complyance with your and their request, I thall Endeavour to give my Sentiments and Submit them to the Corrector of better programents. Chat We may be able to hoge in 40. (ale with greater Evidence & Certainty. Ithink it decessory to Consider the chief Things required to the Conversion of the en Heathen in the East fides, first in General and then with a porticular Application to your Cafe. Now there are four things which seem to me cheefly requisite to ofgod the effecting this great work. he I . A previous Disposition in the Heather to receive Religipel. 11 . A Disposition in christians to promote this Work by their Charitable Contribucon ow, III . Lerfons duely Qualify's to preach the Gospell. us, IV. A Divine Mission or Call from God to such Serfons to this Work I shall Endeavour to flew the Necessity of all the feeting this Work. rif The first Requifite then is some Disposition in the Lorfons to be converted to nd receive the gorpel, No man cometh unto me Jays our Jariout , Except my Jathet who hath Gent me draw him. Where this Drawing of the father, this previous le, Disposition is not, The Gospel will not be received. The Spirit would not duffel It Paul to goe into Billignia, But he gathered aburedly from a vision that he was called of the Lord to preach in Macedonia. Men much be proposed therefore Peld, Geflow for the Recoption of the Greek by God, either outwardly or inwardly or both, or they will not Embrace of Religion which obliges to the Mortification of Townst Nature. in The next Requifite is a Disposition in Christians to carry on this Work by their Charitable and large Contributions. This point is not indeed of Confequence to the determining in your lafe, Get fince farm fouridering the Work in General & am willing (upon another accot) to Show the decessity of this particular. De I cannot say that it is essentially every, for god I and in no need of our Wealth for this Work and (as you well obferve) He has carryed on the Greatest Works without it. The Apostles were allogether

White of this Mean. Ther and Got have I none, said Leter. Yet is it our Indisposited Duty to Employ our hiches when we have them to the flory and in the for ice of the great Donor of them. and that some part of the European Riches ought to be Employ to the Conversion of the Heathen in the Eaft or West Indies I shall give the following red.

- I his is Necessary as a kind of Reparation and Restriction with Thans ought to make to those Heathers for having stramefully Neglected the Salvation of Souls for filthy were's Jake. Christians have drawn their Wealth from the sudies, and shale they make no Returns four. No amount for past Neglects! What has been gained therefore with a sinful omission of the Conversion of the Natives, cannot be better Employed than in a Christian Chardy and Zeal for their salvation.
- 2. This is decessary to remove the great projudice which the Heathen have towered against Thians, as men whose hearts are whollyset to get Riches, and who come among them for no other lind, in which projudice I fear many of the Rounish missionarys have Ensimile Missionary therefore must not only not be but hoursome to the New ... Converts, but also have where of to give unto others That he may hew their evidently that he comes not to feek their Riches, but to fave their vouls; and is willing to support of his own to thorn, rather than to take from them. Thus days of Laul to the form thians. I laught you with quite.
- 3. This is Necessary confidences the Hate of those Countrys, where there are abundance of poor and those reduced in times of scarcily which frequently happens) to the greatest Necessitys, even to y selling their Children, year themselves, and where the Rich (stronto they subrace christianity) unist in a literal Scrip fortake Knidsed. howers and Lossestions, being ast off and things and there by the rest, as the sear of the Castout those who believed in Seles. Therefore that We can make no Christians there but whom we inaimhour Wereit true, it so far from toing an objector against promoting this Work that it is a power ful Motive to the Rich to contribute lowerest it, and a mover of Thompson those whom so and providence: who putts such an opportunity into those transf to be good. For can Riches be better Employed than when they are under a means to fave foul!

  But to return to what more immediately relates to the Case in hall.
- 3. The third Requisite to this Great Work is, Perfons well and duly Qualifit to preach the gornel among the Heather. That every one is not fit to be employed in this Work, but fuch only as are duly Qualified for it. I believe every

every ferious thinking perfor is Envinced, and Experience has su ficiently de it I twill be needless therefore to set about to prove it, I shall rather Endeavere to Shew what are those Qualifications required.

Dis not all the Learning in the world, nor Luich Lasts that can analify a snan for this work, this where the Necessary Inalifications are, Learning and parts man be a good belg. Withless It Saul who below more abundantly than all the apostles, but he who is Employed in this Work ought to be a person of a most oberious and recotlected Frame of Mins, out who has an Experimental Lunowlodge of this fairing Enths of the Gospel what is, who has in a good Degree Lived and practiced the Gospel before he assempts to preach it and therefore one who has in Some Measure Overcome the Coruption of his own Noture, particularly these borne of a mortify of five a meet and humble Soirit, and of a second mind, one who is besides full of Zeal for the flory of God and the Salvation of Souls and willing to spend him self in that Employment.

These I take to be the chief Lualifications required. There be other indeed of lefter Moment which for Orienty's Take Spass over and come to the

God to this work. This I sugar no left Neces from the Milion or a last from God to this work. This I sugar no left Neces from the ment the former: For many run before they are fent; but how that they preach, except they be fent? Lays the apostle. Preach they unay indeed, but how shall they preach in Demonstration of the Spirit and of powers. That is, how flate they freach with the Gracious afristance of God's Holy Spirit, how flate they preach powerfully, effectually, with success attending their Labours except they be sent of God? Our flunch requires of these who are to enter into Holy orders and to preach to Christians by Drofession, that they be moved thereto by the Holy Gliost; How much more is this Necessary in those who are to preach to Institute, for which a greater we fire of grace and of the Holy Spirit of God seems Necessary? 'Lis ust enough therefore that one have all the Qualifications before named, He must all the Rualifications are only the Dispositions of sealled of God loit. These Qualifications are only the Dispositions -

required to the office of an apostle and an ambafadour of God There must & also a Comission and Authority from him to tindertake it. In accord the Work is Gods, and no man should prefume to Enter into it of himsolf. No man baille the apostle, taketh this Honour unto him felf but he who is Calego God as was Naron. There fore our Ble sed Townout, who had a prospect of a plentiful barrest and but few hands to gather it in does not seen to his apostles, find out yearfond who will undertake the work, but Pray the Lond of the Horvest that he will fond forth Labourors into his harvest:

The Greek words are on ws EK son I that he will thrust out Labourors into his harvest:

The Greek words are on ws EK son I that he will thrust out Labourors into his Harvest. The work is Labourious, the Discouragent from the world many and Nature averse to Labour, therefore it is Necessary it God thrust out Labourers, that is, powerfully move and incline them to

Engage in His Work.

But the difficulty is to know what this fall is, or when one is falled Juorder to clear this point, his lobe obforced that this face is oftwo kinds monard & Outward The Inward fall is , when one is powerfully moved by the Holy Spirit, or feels a knoung Impulfo and reftless define to Undertake the work. and this defire is the more pure and the more offenrolly from god, the left felf finds its friterest in it, left Satisfacon ... Nature proposos in it . But when at the same time Nature is rather a fraid and thrink from it. Who was more power fully moved by the Holy Ghoft to preach the gospel than S! Land? and yet he tells us his Preaching was in fear and in much Frembling: Corrupt Clature will even please itself in undertaking good works, and many have been acted only by their falle Brinciple, who have thought thouselves moved by the Holy Spirit, and so their attempts have come to nothing or done more harm than Good. Judeed like the Corrupt afecous are morlified, is very hard to know if the Moving Brinciple be fromlyrace or formal Nature, and Phorefore place the Qualifications required, before the fuward (ace.

The outward fall is either authoritative or providential. The first is when a Lawful authority in touposos and lays it's Emands on the person, The other is whon providence orders and Disposos-things with a Sendency to this work, removes obstacles & makery way easy to it.

The

The authoritative Call, I take to be a Sufficient Call to any Serfon Que for the Engloyment, The providential Call ought care fully to be 06 k as being an Indication of the will of God, But that Call is the moff an 34 and Safe, where both the Outward and the Suward, meet; where the nect Perfor is inwardly moved to the work, and providence outwardly disposs all things lowards it, or authority Lajoyus it. u Thus having Confidered what things are Necessary to the Converte of the Heathen in the East Judies in general, I come to apply their rs to the lafe in hand. agein. 4. As to the first Acquisite . Notwithstanding the Great Liejudice wet the Heathen generally have ag . Thaning, there feems to be at orefert Some disposition in the poran Gentles to receive thogospel. Elis We cled ndj man gather from the Juccefs which the Blefsing of almight ed God, the Labours of the profent Danish Anistronaryos have had , & der: a smuch greater Expected, if the protouded Tians there had not Su= obfrued it, and We man hope that this Dawning of y gospel in thosports will Iproad and growing to the Light of the perfect day. 1 169 2. Its to the Second Requisite, God has likewife been pleased to flir up ells fle Minds of many piously disposed Lerfous to Carry on this work by their Comfels Labours Contributions Glory be to him for of fame. 1 As to the third, Jam, and I boleive those Gentlemen who have we Conversed with you and know you, are likewife of opinion, that God has wrought in you tho most Necessary Lualifications required to the Undertaking this work, praised be his waine for it, and flispe of you will, and earnessly befeech God that you may persevore & daily growing more and more a fit workman for our Emon Ma. bries The only Difficulty thorefore is with respect to the last Requipte mentioned viz! Whether you have a Sufficient Call to His Work But after what has been said on this head in General, Methinks it will not be to hard even to Determine this point. If the Jociety or the Comer for the Mission to the East Judies was

Invested with a power from Eccle fiastical or livil authority to send whom they should fudge Lual food for this work, I should think their Broise or Commands a Sufficient Call beyon, or any other fit perfor. But as no fuch power is Invested in them, We can have Recover fe only to the Juward and Providential Cales for Light in this matter.

The forward all Ithink you have so far as God bas given you a define and fuclination to undertake this work, and that now for some Considerall time past; yet is it not so full and strong that I can advice you to Embrace it imediately, because you have till strong woulds and Teruples about it. For whoever undertakes this Work must go with a full a full affect of the this Work must go with a full affect of the first and Confidence in God, Otherwise when Mountains of Sifficulty or Sounds of Berfecation that and on for will be apt to faint and be difficulty, and his staith (which is his great support) will begue to fail. Thus when Beter upon the winds Cowing hard and the seas Swelling, feared, he began to Sinks.

2. As to the providential (all it does not appear to me that god has as yet so ordered and disposed of Hings with we respect to the work you are at profest Engaged in, Heatyou can leave it without all Joseple and Doubtfulness Not that I think the great unwillingues your people Shew to part with you is or ought to be a sufficient Bar lo your accepting this or any other of this kind for a great deal of their may proceed from Natural Officion, and the tweakness of the Spiritual Children who are generally loo much attacked to the Inframents God makes ufe of. But that I think we cannot with a Safe Confeience de live son lo leave that work till some other fit person is found into whof hands you may Refignit. But the home may come When your Juclination and Juward Jupullate this work may be Stronger your Jouls removed and a fet fler for found to Jucceed you: When thefe things trappen (or that you are otherwife Lawfully discharged from that places) I shall fachidey. God falls you to this work, But till then foure not advise your Quitting your prefent Poft. The Society for Promoting Christian Knowledge reced your accompanied prefent of a printed Copy of the Library of Neufchald accompanied with a very obliging Letter from the word Reveren Dean Mons! Tribolst; and have commanded me in their Names humbly to signify their most respectful Thanks for these Travours.

It is with great pleasure they observe so good a Disposition in the Resound Churches abroad to restore the use of Liturgys to their Antient Dignity.

The Example of the Newfehatel Siturgy so wifely adapted to the Solemn Offices of the church, will tis hoped very much help to propagate the Esteem of Liturgys; especially among those who are convinced of the Importance that all the publick offices of the church should be well understood by those that joyn in them, and that two neuch paint cannot be taken, to digest them into that plainess, and Majesty of Style, which becomes our common Advertees to the Supreme Governor of Style, which

These Excellent Persons who composed the Liturgy of Nonfethatel have given evident proofs of their Skill in choosing the Materials propor for such a Composure, nor it it prosumption to think they were divinely assisted to bring it to that perfection which it has.

His, and future Ages will have cause to rejoyce in the Labours of the Happy Men who have been the Instruments of accomplishing this Nominable Work, and God will have the Glory of it by a more regular and exalted Donotion from this People.

## Reverendissimes

La Société pour l'Avancement de la Connoissance Chrétiennes a veau l'agréable present qu'il vous à plu lui faire d'un Exemplaire de la Libergie de Neufchâtel, accompagné d'une Lettre très obligeante de Monsieur Le Doyen Fribolet; et elle m'a ordonné de vous rendre en son nom ses très humbles & très respectueuses actions de graces pour l'une 4 pour l'autre de ces faveurs.

C'est avec un sensible plaisir que la Société remarque une sibenne disposition dans les Eglises Reformées au de la de la mer; à rétablir l'usage des Libergies dans leur ancienne dignité.

Il y a lieu d'esperer que l'exemple de la Liturgie de Neufchalel si sugement adaptée aux Offices solemnels de l'Eglise, sera d'un grand secours pour chendre l'estime des Liturgies, sur tout ponmiceux qui sont convaincus combien il importe que tous les Offices publies de l'Eglise soient bien entendus pour ceux qui y afsistent; et qu'on ne sauroit prend trop de soin pour les digener dans ce style simple le majestueux si convernable que prières que nous adrefsons en commun au suprême Gouver ?

Les Excellens Hommes qui ont composé la Liturgie de Neuschale out donné des preuves évidentes de leur habileté; en choisissant les Materiaux propres pour une telle Composition; Et il n'y a pas de la prosonption à penser qu'ils ont été divinement assistez pour la monor à la persection qu'elle a.

Ge

The Society congratulate you who have shared in this honour upon the Success of it, and with great Respect assure you of their hearty Wishes for the Prosperity of the clurches of Neufchatel and Vallangin and all their Spiritual Guides

The Society for promoting Christian Knowledge were very agreeably Surprized at your kind Compliance with their Request to favow them at your Leasure with an intive Copy of the Arguments and Exhortations, used before, and after reading the Holy Scripture in the churches of Neufchatel.

The Excellent Spirit, which they found in the Specimen of this Work, that accompanyed a former Copy of the Newfebratel Liturgy, which you was pleafe to prefent to them, induced them to make this request? and your ready Compliance with it; has laid them under very great Obligations not without some apprehensions of having trespassed on your Goodness by desiring a favour which would have been the Work of many years to some other Men

Ce siècle et les futurs auront sujet de se réjouir des travaux de ces de heureux Personnages, qui ont été les Instrumens de l'accomplifsement de cet admirable Ouvrage; Et Dieu en aura la gluie, par la Devotion de son peuple plus regulière et plus relevée.

La Société Vous félicite, Messieurs, sur l'heureux succes de cette Entreprise, pour la part que vous avez l'honneur d'y avoir euë; Et Elle vous assûre avec beaucoup de respect de ses voeux tres sincères & tres ander pour la prosperité des Églises de Neuschâtel et de Vallangier, et pour celle deleurs Guides spirituels.

The Society were not a little concerned to understand by M. Chamberlaged that Offence has been taken at the Nord Embryo in the advertizement profit to the Franklation of the Liberry: It must be owned that the Expression was inscribed by our late Excellent ME De la Mothe and I dare affirm that he inscribed by our late Excellent ME De la Mothe and I dare affirm that he inscribed it as a Complement to the Nonfehatel Liturgy however it has been confirmed; His Consummate Moderty include him to call every thing that he would recomend Essays or Embryos that never so elaborate and perfect in their kind to stop the Mouths of Eaptious Scopele, and to create an Admiration in the Candid Reader that if the Embryo be thus perfect what must the factus grown to Maturity be: Besides he knew how jealous some People among us would have been of a Design to lessen the Reputation of the English Liberry, by publishing a Bright forough Composure of that Nahire, as if ours wanted mending unless he had prevented such a Sealousy by acknowledging this to be but an Embryo.

The truth is it will not sound so well in your Parts as in this Country for webouly the advertizement was calculated; And if it had been considered y soul English Copys would be dispersed at Newschatel I am sure M. De la Mothe was a great a Loven of Instructs in his Expressions and Fenderuress to avoid any thing offensive that he would never have used it: However I am ordered to assure you that core will be taken to leave out in the next Edition this, or any other - Expressions we you shall be pleased to Commicale as having given offence, and I so at the same time Subscribe myself

Jehools hill Scould have the direction of the Society upon them.

This boing a Matter that required to be well considered all your Letters upon that Subject have been referd to a Comittee and after several Debates and hearing the opinion of some Criticks in Classick Loarning, they are of opinion it must be left at present as it is now to the judgement of the Masters of our Great Schools who will not be persuaded that Roman Latin can be found any whore but in Roman Authors.

That the they would be glad to see such a collection as you mention out of Castalies Franslation of the Proverby Ic published for the use of Schools, they cannot equally approve of the use of fatin Plays the the ratio were polite and the Subject Divine, because so much Mischeif has bun done to youth by the abuse of Plays, that it were better to keep them at a distance even from those which are inocent to give them an abhorrence of the far greater part which are not so; and least of all would it be come the Society to encourage them after the pains they have taken to reform our Theatres, and to hinder an introduction of an imitation of them into our Charity Thools as was attempted not long sinu in rondon under a pretence of leaching the Children to pronounce their looseds finely and with good afsurance.

This considered, there is little encouragement to undertake the correction of Anglorum Bralia as you proposed, however fam to thank you for the Suggestion and the loan of y book which shall be returned by the first safe conveyance.

To Cap Morris at Carlile 18.7ber 1716.

In an five to yours of the 13 th of the last month, The Society are very much obliged by yo Solicitude for the promoting the effortual Support of affairly School mafter in your parts by Enclosing part of a Comois in a Mannor of the Duke of Porland, upon which Subject & have wrote by this Coft to the Bathop of Carlile attember of our dociety topping his Lording Letter and Interest with his Grace in the affair, In the mountime fam to defire you would wait on his Lordflip Is Explain what you did not Clearly Express in you Letter whether this request is to be in Cohalfe of Bellinge where you date yo Letter from , or any faifle in Carlile - A Celilion of the Inhabitants Setting for the the Luantily and Schuckion of the Land to bo bogd of his Grace will be necessary, in which the good Found readily advise.

astothe opinion of the Society Encerning Handing Standing while He free bfalus are Sung, they sont think it proper in this or any other Caple offer it in a dictating manner, but they cannot but agree with many of the fathers of the lunch who have recommended this and able Cuftom as not only consonant to the practice of the Crimitive Liany but generally used even to this day in the thurch of England while the Cfalms are read and in many Church so in London while they are lung esponially during the admination of the lord Supper. But in any thing of this holy Sairament of the lord Supper. But in any thing of this nature the Society had nother tefer thompsood and their Members tope opinion of the Bifle of the leveral Niocefor where fuch practice is Endeavord to to fulro duced.

Go Letter of the & December last with your Thanks for the packet was reced in due time, and communicated to the Society, and what you theorein observed concerning the hildren of Gramar Schools breaking up in a Rebellious manner, being a Smatter that well deserved their Consideration, they referd it to a Comittee upon whose Report, the Society have ordered me to dequaint you, that they are of opinion, That Notice be given by every mafter where so disorderly a practice has prevailed, that the Schools under their Care shall be broke up, and the day twhen, before the usual times of breaking up. That if this method

observed

observed by the Master in a prudent manner does not am flood the end, that the Minister of the Parish, or Bishop of the Dioce for bumbly applyed to, and desired toufer their Authority in Suppressing afractice of soill a Tendency. And the Society are also of opinion that the fe disorders are greatly owing to the Imprudent management of the masters thomselves, whose Duty it is frequently to Incule winpon the minds of the Suitoren The principles of obedience and Subjection to the feelow over the sufferent the Care of them.

Youth when grown up to be Rebells against flicir Ving & fountry is wery just, and if the masters could be provailed with to do their parts in Corrocting so disorderly apractice, it would soon be laid a side Notwithstanding the prefences that are used to Ennive at it.

of last Month sooner than it may be I shoud hove done to prevent the confinction I find you are pleased to put upon my Filence, Though Jmust acquaint you that if my Memorand. are right you have you have had a letter from the Society since yours dated the 6th of hove an Answer to which was sent the 27th of the same Month accompanying the Society's Circular Letter will your last seems to intimate never came to your hand. Give me leave therefore to send you another lopy of the Circular Letter with the Substance of what was then added as for formy Memory will help me viz. That the Society thanked you for your hint of an Expedient for increasing the Charity Ichools by promising a disabling Clause in some act of Parliament to prevent any poor gaining a Settlement any where but the place wherein they where born, except they could read and write; And also to mix some sold of work with the Childrens Sedentary Learning in the Charity Ichools to inure them to Sabour as well as for the Profit of it.

This Letter Ithen Signify'd to you was refer to the Comittee, and as soon as Scould inform you of the result of their thoughts, and the

Society's concurrence in them you should hear from me .

Gean now acquaint you that the Committee have considered of you kind Suggestion and are of Opinion that it will not be advisable to urge any thing in favour of the Charity Schools in Parliam. him the Prejudices some Hon! Members have conceived against them as if they were Nurferies of Sedition & Rebellion instead of Religion and good manners are more worn off some Masters & Misheyes we their Children have given too great occasion for such fealousies.

Learning the Society have upon the Comittees report unanimously agreed to the Expediency of it, and resolved to recomend it by one or more Claufes in their next Circular Letter. And in Order to this The Rev. M. Tox of Potterne in will the having had this matter much on his thoughts I have been directed to put into his hands as is actually done all the Hints will find among if Society's papers upon this head with a desire that he would prepare such a Claufe or Claufes as may be proper to excite the Society's Correspondents to make some attempts herein.

Os to the main part of your last letter fam glad to acquaint you that you have been mit informed about the want of Unanimity in the proceedings of the Society; It is not to be expedied in so great a Body that every member should have the same Sentime with one another but God be praife they have hitherto & Shope ever will agree, in the Chief Ends of their Institution, the Glory of God & the Good of mankind what might give occasion to those that informed you to think otherwise perhaps was their late debates about a place to meet in, we is now amicably decided I believe to the Satisfaction of those that opposed going to S. Pauls Chapter House for fear it should occasion a thin attendance on the busines of the Jociety, but the trial of it has convined them that the Jociety was never better attended than now it is and those members to whom the removal at first seem'd inconvenient do Still come lo give their assistance in the wefull work of the Jociety. Several poor hilbren in the habit of thaily hilbren being observed to past their time toly in the Areets, and by Gaming, ill Language Begging or other misbehaviour to bring a clandal on the Design of Charity Chools: o-Ind there being reason to believe that these pour Children may be such on have deferted the chools to which they belonge or have been discharged or great faults, by their respective Trustees, who in compassion suffer them to carry of their floaths, especially when they are much worne.

To remedy such inconvenience for the future it is proposto that every Charity Child have a Badge in Sopper or Sender sound on some part of their Cloath's signifying the School they belong to, and the Number of Bays or Girls in that School, and that such Badge be taken of whenever a Boy or Girl is dismiss from School.

M. Harbottle rehand to London a fewdays since show has be sent way nuch pleas o with the kind reception you gave him and he is the sent of preparing himself to wait on you to open the School as soon as - his private affairs can be adjusted which he hopes may be in a few days.

Super this Occasion fam further to acquaint you; the Society being informed that M! Barrington had a Considerable, Estate in the Larish of thrusham, desired the favour of line to come and discourte with them about the State of the farish: Several things falling from him in Discourse which they that would be very useful degulation for the School, they desired him to take the houble to put down his Shaks in wishing which he was pleased to comply with, and layd their before the society, where they were seed and very much approved a Copy of them is horewith enclosed to good by their Order to be come municated to the worky Revonoters of this Thereby, as what in their Opinion may make the School that is about to be vected — peculiarly beneficial to the parish.

The Society is very fully satisfy that it would be of Great fue:

portrace to the publick Good that all the Charity Schools should as mick
as possible be made thersevier of fudultry as well as Earning but being
puffer up by the latter the Gilbren should become uncapable of the 
former:

It must be own a there is not one Boy or Girb
educated in these school, but what are designed for Servante to

some

Some Man or Woman in Ale Kingdom, and probably for some labo. rious Employment, and therefore whatever disqualifies them for such Services must carefully be avoided: And it is but too evident that a great part of the time is spent in Jelenes at all then sort of Schools, where some labour is not added to the Gildeen's Searning, for want of which those educated in them are no cofin taked for invent diversions and sometimes unlucky hicks to fill up Plair vacant Hours.

The Joseff likewife Mink M. Barrington Reason for regarding the Goels in this therity before the Boys are of great weight, and therefore recomend it to you and the rest of the worky fromoters of this school to consider whether 46. Therety will not become more useful and extensive by providing for all the poor gods preferably to but not exclusive of the Boys.

The Society were glad to find a Gentleman of M. Barringtons Known good Haracter in the word, and pherest particularly in your Levish, so ready to countenance your Undertaking repor regulations so agreable to their own dentiments, and they doubt not, but the afistance ofto worthy a Benefactor will be highly Beneficial to the Design.

Jagain heartily with you success in this affair and

## Regulations proposed for the School or School of In Berkshire

- In That a pumber of Girls equal at least with the boys, be admitted in such School or Schools, till at the Girls of Shrinham, Bourton, & Watch feeld are admitted that will come to School; the Girls being a much greater—Buther to the Rarish when they are ill educated, than the Boys, who are—employed in the Husbandry Work of the Larish: Whereas no Body will takes Girls that are illeducated to be conant: in their Familys, the common & most usefull way of praviding for Girls a good Education, than poor boys; Because when such poor Girls come to grow up, and become Mothers of Families, the Roucetion, and Management of the Bren in their Families, will depend chiefly on them, whilst the Traffeer is employed in providing for their Support and Maintenance.
- 2. That (hildren be taken into the School from 4. or 5: years ord, the being an age when they are aspable of Learning, and least capable of any Labour or Employment: And that notified continue above 3. years in such Tchool unless with the approbation of the Majority of the Subscribers; Tchool being to be considered only as Nursevies of Learning, Virtue and Industry, and not as Hospitals, in which children are to spend their youth, or to be kept out of harms way.
- 3. That the Hours of Schooling be from & in the Summer & g. in the Winter to 11. in the forenoon, and from 1. till 4. in the Summer and 3. in the Winter in the afternoon; that so the Larenti of such Suit wild: as shall go to such School or Schools may have the help & affishance of their thickore in the Morning and Evening at home which is usually the time, when their affithance is chiefly manted; That the hildren

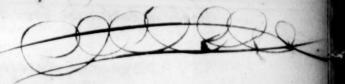

Children may still be kained up to Labour without ever being wholly hurn'd from the Labour of the Body to Learning or from Labour only to such more easy work as they may be employed in at School.

That none of the Gildren learn to read above half the fine they shall be at School; and that for the other half of the time they be put to some weefed work; the girls to pinning knutting, Ordewing; The Boys to spinning, Provided that if any Lorson of the parish is willing to employ any of the Silozen for the whole day, or part of the day, such hild shall not go to, or continue at school, during such time: This Welled will go some way toward defraying the harge of the Teleood, or towards the maintenance and support of the tied; will enure the hildren to rousky and sometime to hard Labour; have them up for the Husbandry of the Larith; and make the school Subscricent to the Interest of Husbandry which is the brue present of the Larith with respect to cheef, and with Relation to England: Whereas terening them only to read is using them to a more Lazy feder - favy Sife propor enough po yenhemen Scholars, and some Sortof Sademen but no ways fitting for those that are to get Miero Verelihood afterward by Labouring hard; and of the harmord may not have such had row at any time out of the chool at they are willing to employ, the School will timber the Llough and offer Husbandry Work of the Larite, instead ofbeing subservient toit, as it ought fobe.

5. That for preventing the Rudoness the children may learn one of another by coming together which will offen happen as well as the great Los of time, the Damage to their Apparel,

and the Brejudice it may be to the Children's Health from their conin in unscasonable Weather, and other Inconveniencies to two of the Sift if the Children of those two Systings should come to any one Systing to taught, there be Endeavours west toget proper Masters or Mistrefies & asuitable Encouragement for them in the several Systings to teach the Children of their respective Systings, or til that can be done the Master go two days in the Week to each Systing, in which are the Hours of Schooling should be from 7 in the summer and 8 in the Winter to 11 in the foreneon, and from 1 to 5 in the Summer and 4 in the Winter in the Offer noon.

Because the good Effects of such Schools depend in great Measure upon the proper choice of the Masters or Mistresses, that the Masters & Mistresses shall be constantly chosen by the Major Vote of the Contributes or by such Trustees or Managers as they shall appoint and likewise shall be displaced by them, whenever they regist.

pprovidenthe 1719. having been Communicated to the Society was so acceptable & Edifying - mittee 27. June that they soon after gave Directions for Publishing it, that all their Corresponds might Share in the Heasure of Perusing it?

As no man perhaps has had a greater Experience of the Lower, - Wisdom and Goodness of that benign Providence which Superinteness all Sublunary Offairs than Professor Franks to his evaratives of the Mustrious Instances of that Divine Goodness, are an Entertainment that must be very agreeable to every man that is possess of a heligious Sense of his Dependance on the same gracious Providence: and when dark and Discouraging Dispensations attend us, the Experience of all Agos as well as the Holy Scriptures have taught us to believe they are mitended by God to exercise our Faith in his Sower and Goodness, for the his ways are unsearchable they are ever the Result of uncering Misdom.

Awas notlong after the Receit of your Letter that the Lociety receive Advice of the Death of the Indefatigable M. Tiegenbalg at Tranquebar and by the last Ships thence they are Informed of the Death of the truly Saborious Mr. Grundler These faithfule Missionaries were remarkable for their hesignation to GoD in their Lives and Death's nor would become us to be less Hesignid, for the the Care of the Survivors in the Mission is thereby very much Increase thereis this Consolation remaining that the same Omnipotent GoD who rais'd Thom of to do such Signal Service for advancing Christ's Kingdom among the Heathen is not less Cowerfull to raise up other Instruments for accomplishing his own Work, which in the Beginning of it we well remember labourd under Difficulties that Seemid insuperable, and yet how prosperous was it by the Overruling hand of GOD . It was the same good Providence direct sending over three Candidates for the Mifrion at so Seasonable a Sunchus that the Lofs of these hoo Excellent Cerfons was in some Meafure immediately repaired, saving that greater Deligence will be required to carry on the Superstructure begun by such experiened architects, and even this Difficulty is the Left since it pleats God to frare the Life of til Grundle

so long as it was after the arrivat of Mess! Schultz, & Dall se. But that nothing may be wanting in their European Friends to encount them, the Society trusting in the same gracious Direction and Blefsing won their sude from have resdo'd on their parts of GOD to leave nothing undone which may be in their Lower to support so Evangelick an Undertaking that promises so great a Harvest, and doubt not of your Concurrence by your carnest Trayers, Advice & Labours Effecting any Measures that shall be thought proper herein.

Then our Excellent Arch top. D. Wake first heard of m. Grundler's Death His Grace expressed a just concern for so great a dofs, and Signified His Hoafure to the Jociety that Profesor Frank, and their other Friends a broad in Europe should without Lofs of hime, be consulted in the fittest means

for repairing so great a hofs.

the Society by the Kever M. The Society therefore presuming on your Grace's Goodness to encourage by your Recommendation, what you have already liberally promoted by your Charitables Contribution, have ordered me in their Names, humbly to request, that your grace would be plead to favour them with a Recommendation of the Design to be published with the said New Edition of the Extracts of Letters &c.

If your grace should think fit to approve of this Proposal, the Society humbly desire your grace to communicate it to the Sords the Bishops of this Kingdom, in hopes of their Concurrence in encouraging so good a North

Something of this Thind was done by several Bishops about ten years since, when the Society promoted an Edition of the Bitte and Common Prayer Book in Welch; and as that had the Succeptions the Society hope so powerful a Recommendation will gain many Benefactions to this Design, and enable them to extend the Imprefix of the New Fostament in Arabich to a Muncles equal to, if not pute than that of the Balles.

But It Lordshijo, being informed of their Intentions, was pleased to signify unto them, the as He had at first refused His Hand to the recommending of your Version to publick Upe: so neither could the now approve of it so far as to consent that your Collection should be recommended as being conformable to his Scheme, which I have berein enclosed. For notwith tailing the great takes this south professes himself to have for the spicty, Learning and Indgement of Sir A. Blackmore, yet the is now, and always was of the opinion, that the few obsolete Expressions of the old Version are les prejudicial to the Edification of the modern Versions; as also that the referring the people to proper places in the Salows, which they buy of Course with their Bibles will have a much better and much more general Influence than any of the new Versions, which very few, in Comparison, will buy. And for these heasons, His Lordship declares, that he cannot agree, that Fis Scheme, which was calculated only for the Common Translation, be apply'd (contrary to his Intention and Indgement The Society therefore command me to inform you of this unexpected Stop to their publishing the Collection which you have been so kind as to make out of your own Version of the Isalins, and again to thank you for the great Trouble you have had in it, and to affure you, Sir, at the sametime, that You have always their prayers to almighty GOD, that He will ble fand in his due time reward all your Designs and Labours to promote the Glory, and the good of Mankind. His Lordship thought that part of the Isalin proposed was very proper if the Hords of any of the Licensed Versions were used with the noble lofty June to which the words of that Balm are fitted, wherein the Common Scople are generally so well versed as to able to joyn with the Children, whereas a New Jours must with Trouble and Expence be desirous to join in the same Jong of Fraise. The Society have too great a difference for his Lordship's Judgment in this matter to decline following it, and they hope you will be of the same Sentiment with them, and give your Directions to put into the (hildren's hands such Words to be sung (to a Same that is known) on this publick Occasion as shall be taken out of a Licensed borsion. His Lordships Directions on this head as published some time since were so well received by the Trustees as well as of the Society, that a Deputation was appointed to thank his Lordship for them, and therefore they think it would it become either of those Sodies to deviate from them: and it was with this view that the Society come to a Resolution in July last of not defraying the Exposes of a Singing Master at the anniversary Meeting of the Charify Hildren, as being in their opinion very contrary to the Design of his Lordships Directions. Rev? Sus

I am as havid to find yor joynt Letter of

October, 24.1728. not yet acknowledged with the Respect it defend the reason of which was a prospect that there would be occasion to write to you largely on the Subject of the Mission to the East Indies, as soon as the Missionaries Letters from thence should arrive; when they came sometime was necessarily spent in translating of them, and of their Journals before the Society could be appried of what was proper to be signified, and thensor dispatch sake, they were obliged to request the Red Me Treegenhagen to carry on their Correspondence with himon that Subject He being a Perfect Master of the sons of the Priginal Letters from the Missionaries, was most capable of dring this service.

Your great candour will Shope accept this as an apology for my long Silence; Sam now by particular of der from the Society, to thank you for the edifying Account you gave to them, in the letter, above mentioned of the flo rishing condition of the Rospital at Glancha after it had pleased God to take to himself the late Rev Profess Frank your Excellent Father, the happy Founder of it: and in forsequence of this, the Society have taken care by a Paragraph in their last Eircular Letter to notify to all their Members in this Kingdom the prefent prosperity of that wonderfull Foundation, as matter of great Soyto them, and thankfullness to God under the Concern which the News of Prof. Frank's Decease had raise in the minds of all wellwishers to it.

The Society congratulate you on the fuere is of y Labours, and on the finites of His Majesty the King of Prufix on & Foundation whose Princely Favours to wards it they hope may continue, and that God who has made him a powerful Patron to the Protestant fauge in Germany may graciously incline His Royal Heart to a special Regard to a seminary so much devoted to the Service of the

Protostant Religion, and the Common Benefit of Manhino:

In October last the Society received by M' Liegenhagen yo. hind advices in answer to what he had wrote to you, and thank you for them, particularly for your readiness to accept of recommending a proper Person to be sent as an affir tant to M' Schuttze at Fort S' George, and also for yo Prudent advice relating to the Circumstances of his Removal from Transfellebar, which gave the Society the first notice of its being without the Privity and Confert of the Illustrious College at Copenhagen, but now it is hopd M' Liegenhagen.

Ziegenhagen's representation on 40. Advice has prevented all Umbrage of Offence to those Hono. Perfons.

In San last Freceiod your Favour of the 10. of that Month accompanying the Rever Mes Worm, Richtsleig, Sartorius and D'Schlegemilch whom we had impatiently expected, fearing they would come too late to embark in the Ships now gone to India; and their arrival here was so critical that had they come a week later they could not obtain a passage, Seven the Favour of their going now, would not have been granted by the East India Company here, without the interposition of Ster Most Gracious e Masses, so much were the last Ships for Fort I George crowded with Passengers.

The contents of your last letter have been laid before the Society and they are very sensible of the great pains you have taken to volige them with a proper Afsistant to M. Schultze the impediment that attended IN Vahl's accepting of the witation made to him; your Self Denial in parting with a Perfon so necessary to the Hospital as M. Sartowing, and his acceptance of your nomination of him, at so that a warning are all concurring Events of Providence which the Lequel of things will best explain; In the mean time; Sam ordered in the most respectfull manner to give you the Thanks of the Society for these remarkable. Instances of your good will to them, and their Designs.

There not being accomodations for all the Missionaries on board of any one ship, Mep. Worm, and D' Schlegemilch emarke on board the Gragge Cap! Grantham Command, and M' Sartorius and M' Richtling on board the Bridgewater Cap! Williamson Com. and the 10 day of this month they saile from the Downs after having waited sometime there for a fair wind.

Ishall with pleasure let you know of any elecount of their welfare as it comes to my knowledge, and whether you write to M' Ziegenhagen, or Me what you would have communicated to the Society, it will be equally acceptable by M' Freylinghausen, and you with that unfeignd respect with which Subscribe my self.

Pos hear that the Graggs and Bridgwater meeting with contany Winds, H. N. put back to Portsmouth but that they saile again the 23 fun & have since had a very fair wind.
